

Point of View Core of Commonality

While it's crucially important to support people's individuality, Herman Miller also believes that recognizing our core of commonality is key to a balanced view of what makes us who we are. Understanding the things that unite us—in body, mind, and spirit—helps us appreciate and make use of the common ground that we all share. Providing workspaces that recognize these commonalities can attract, develop, and engage employees and strengthen the organization that brings them together.
